Buddhism Syncretism

The syncretism is the amalgamation or attempted amalgamation of different religions, cultures, or schools of thought.

Buddhism became a world religion is due to its syncretism of different animists practices and thoughts. Recently years, we found that Buddhism began to syncretize the Bible and Christian Church for its flexibility in world.

Essentially, the syncretism is a kind of plagiarism -- the practice of taking someone else's work or ideas and passing them off as one's own. Through this way, they confuse many naive people to permanently get away from the truth. Moreover, they have to distort or destroy the original one after taking it in order to distinguish himself from others. "The thief comes only to steal and kill and destroy;" (John 10:10)

Sample of practice adopted in history

- Buddha pray beads (Rosary)(4th Century AD)
- Crown (5th Century AD)
- clothing/robs
- Vegetarianism (7th Century AD)
- Gongfu (life power, martial, 500 AD in China Henan)
- divination/prediction (5th century AD)
- taboo (5th Century AD)
- Literature/arts (6th century AD)
- novels (16th century AD)

Recent Syncretism Adopted from Christian Church

- Music / songs / Choir (recent years)
- Children Care (recent years)
- Sunday School (recent years)
- Acceptance of children monks (recent years)
- Public leaflet/movies/multimedia flooding (recent years)

Buddhism is undergoing a radical change in its history that I never saw before recently.

Buddhism Influence in the World

Buddhism is widely considered the most peaceful religion in the world. Over the past two thousands of years, experienced several times of persecution, the Buddhism had eventually conquered all the Chinese earlier thoughts and culture, and became the master religion of China. Now with the sympathy of being discriminated, Buddhism had steadily spread into American and other Christian territory and seems to be winning all hearts of the world silently.

Prominent Figures include Albert Einstein, Dalai Lama, Mark Zuckerberg, etc.

A mother brought her child to Buddhist monk for divination and to seek the protection, benevolence and bless.

(Albert Einstein 1941)

“The religion of the future will be a cosmic religion. It should transcend a personal god and avoid dogmas and theology. Covering both the natural and the spiritual, it should be based on a religious sense arising from the experience of all things, natural and spiritual and a meaningful unity.

Buddhism answers this description. If there is any religion that would cope with modern scientific needs, it would be Buddhism.”
